## EXPERIENCE

- 2019 - 2021 **MINT Social**  
**Project Manager, Lead Developer,**  
Programmer, Development/Designer, and Project Coordinator - I managed an overseas development team. Worked with company clients on business websites and seo team to implement tracking codes. Research and implementation of project workflow.
- 2019 - 2020 **cellBONES Technologies**  
**VP of Product Management**  
Programmer, Development/Designer, and Project Coordinator - I developed company websites, design and app engineering. In addition, I oversaw programmers, including some located overseas. With excellent communication abilities, I was able to get projects to completion. My attention to detail and organizational skills is what helped get this startup company cutting edge look that they still use today.
- 2013 - Present **GOBlazon, LLC**  
**Programmer, Development/Designer, and Project**  
With an established background, I fully fulfilled the roles of Office Manager, Programmer, Designer, and working with sales. I lead the business-to-business sales and development for the company. Through these efforts, I am able to successfully build client portfolios, developing a strong foundation for thriving marketing campaigns, including seo, web dev, app dev, and graphic design.
- 2011 - 2015 **MiCamp Solutions, LLC**  
**Programmer and Development/Designer**  
My duties and responsibilities with MiCamp Solutions, LLC involves the development and design of the website, with additional tasks relating to strategic marketing strategies. While working with multiple supervisors on specific projects, I'm able to fully manage projects with other vendors using Basecamp to deliver quality work in a timely and efficient manner.
